The Coun'y Convention was called to order in the court house, at Bedford, on Tuesday, July 31, at 1:30 o'clock p. m., by E. F. Kerr, Esq., chairman of

the Democratic county committee. He appointed Frederick O. Casteel, of Bean's Cove. Lloyd Claycomb, of West St. Clair, and L. W. Hite, of Cumberland Valley, secretaries to assist in the organization. A roll call of the delegates, returned as elected, showed a full attendance. Despite the heat and the busy season

of the year, the court room was crowded with clear-headed, intelligent and determined citizens, all of whom seemed inspired with the prospects of victory in November.

On motion, Dr. Americus Enfield, of Bedford, was elected president of the convention, and Henry P. Diehl, of Colerain, and Dr. S. G. Statler, of Pleasantville, vice presidents, and the above named gentlemen were continued as permanent secretaries.

Upon assuming his position as president. Dr. Enfield in his eloquent and forceful manner addressed the convention at length, and transmitted to his andience some of the enthusiasm that pervades his nature. The inspiration

of his remarks remained with the del egates throughout their deliberations The convention being organized on adopted, viz:

Nominations for legislature.

Nomination of associate judge. Nomination of candidate for poo director.

5th. Nomination of jury commis ioner.

6th. Action on congressional matter.

On motion of Dr. Grazier, of Nev Paris, the president was requested and instructed to appoint five delegates as a committee on resolutions, to whom all resolutions were to be referred, and the following were appointed, to wit: Dr. W. A. Grazier, of New Paris; S. S. Nave, of Cumberland Valley; James humane provisions should be made for the care and comfort of the unfortunate positions. of Bedford, and Benjamin F. For legislature, Dr. W. F. Enfield was named by Ross Fletcher; John T. Matt by James Boor, and Hon. E. S. Doty by George Eicholtz. Because the tellers did not agree in their tally, a second ballot was necessary and resulted as follows:

Dr. W. F. Enfield..... John T. Matt..... Hon. E. S. Doty..... 57 Enfield and Doty having a majority

of all the votes cast, were declared the nominees. On motion of John T. Matt, after a

nest address by him, in which he showed himself to be a sterling Democrat, a noble man and a graceful speaker, the nominations of Enfield and Doty were made unanimous. For associate judge, William H. Cup-

due form, withdrawn, when a second allot resulted as follows:

C. C. Snell was declared the nominee. For jury commissioner, M. L. Snyder, Bloomfield; James Colling, South-ampton; Wm. J. Pascoc, Rainsburg; pallot resulted as follows:

by James Boor. The president recognized Mr. Kerr and accorded him the privilege of addressing the convention.

After returning thanks to the friends among the delegates and the voters throughout the county, who had urged him to become a congressional candidate, he emphatically declared that he was not and had not been a candidate for congressional nomination; but, he was thoroughly convinced that, in regard to this important question there was but one wise and judicious course for the Democrats of Bedford county to pursue; and that course was to select fair and impartial conferees who had at heart only the best inter ests of the Democracy of the county and the district, and have them meet like conferees from other counties of the district, and deliberately select some capable and available gentleman to be our standard bearer. While he did not wish to even appear as oppos ing the naming of any Bedford county Democrat for this honorable and responsible position, his sense of duty constrained him to make this suggestion, and he would leave the question to the delegates for their decision and

was also withdrawn, and a ballot was ordered and taken, which resulted in seventy votes for Daniel S. Horn, Raq and nine votes for Judge Bear.

On motion of J. B. Butts the nomina tion of Daniel S. Horn, Esq., was made unanimous and he was authorized to select his own conferees. Dr. Grazier, chairman of the commit-

tee on resolutions here stated that his committee had performed the duty assigned it, and was ready to report James Boor, secretary of the committee, took his position on the bench, and with clarion voice and animated tions, which were enthusiastically adopted as the platform of the county Democracy, to wit:

The duty of the Democrats in this

ongressional district is to select the best and strongest man as their nomince. This is not the year to throw away the nomination to gratify the personal whims of any one. With the bitter, corrupt and disgraceful contests to seenre the nomination in the Republican party thousands of the number possible in a hundred years. best men of that party are tired and disgusted and would gladly vote for a thoroughly reputable Democrat as a scramble for the place. The question of making a suitable nomination is holding the audience closely. "The right up to the Democrats and their action will determine who will represent this district in the next congress.

The gold Democrats of 1896 have re-

turned to the regular Democracy all barred by the rules of civilized warever the country and are now doing faithful service in this year's campaign in support of Bryan and Stevenson. The only exception to this is an occasional case where a so-called gold Democrat either has now, or is now seeking an office in the Republican a most bright and hopeful way, and party. The Republicans have been exceedingly liberal in turning over work with the topic "Easy steps to them to leave their party, but even these bribes have not been sufficient inducement to make any impression on the Democratic vote. True Democrats have higher aims than the mere sceking of office. Henry Watterson, Bourke Cochran and all the brilliant leaders of the Palmer and Buckner movement of 1896 are now just as Saperintendent," which was full of faithfully working to elect the Democratic candidates for president. The Democratic party has never been so thoroughly united as it now is since the campaign of 1802 when it swept

the country.

The British lost at Bunker Hill and Yorktown, but they have captured Washington and the McKinley admin stration. It is the policy of England that the United States shall carry on a war in the Philippines and the Mc-Kinley administration is carrying out their wishes to the queen's taste. England believes this will detract atention from her attempt to crush out the Boer republics. HUMBERT ASSASSINATED.

King of Italy Killed By an Anarchist Fro Monza, Italy, July 30.-King Hum-

bert has been assassinated. He was shot here last evening by a man named Angelo Bressl de Prato and died in a few minutes. The assassin is an anarchist, a member of the International society. The King had been attending a distribution of prizes in connection with a gymnastic competition. He had just entered his carriage, with his aide-de-camp, amid the cheers of the crowd, when he was struck by three revolver shots fired in quick succession. One plerced the heart of his majesty, who fell back and expired in a few minutes. The assassin was immediately arrested and, with some difficulty, was saved from the fury of the populace. He gave his name as Angelo Bressi, describing himself as of Prato, in Tuscany.

The assassin's name is variously former mother-in-law. Fact, we assure given as Angelo and Gaetno Bressie. He was born in Prato, November 10, 1869, and is a weaver by trade. This is the United States government contradictory to the Chinese representations that the Imperial government had steadfastly and from the first opposed the Boxer movement. Exchanges in constant progress between the powers are tending more and more to cast suspicion upon the genuineness of the many communications that have come from Pekin through Chinese govern ment sources. If it should be established that there has been an attempt on the part of the Chinese to practice Mrs. Nancy Andrews. a gigantic fraud upon the world, this fact may call for a change of attitude on the part of the United States gov ernment toward China. This would not affect the military policy already under way, but merely the technica relations between the two governments, which would closely approxi-

mate a state of formal war.

The official determination of the

gold Democrats not to put a ticket in the field this fall, is a great triumph for the Democratic party, as it is evident that nearly all those who voted for Palmer and Buckner in 1896 will this year return to their old al legiance. Some few gold Democrats may vote for McKinley, but they will this week. nearly all be men who supported him in 1896 and not those who put up at intendent of the Keeley Institute, Har- | the Bedford division, and his successor, the half-way house in that year. As everyone knows, the Palmer and Buckner movement was engineered with the direct intention of getting votes for McKinley and not for its own Huntingdon, spent Sunday at the ticket. Senator Palmer, himself, towards the end of the campaign, advised his supporters to vote for Mc Kinley instead of for himself, and his appeal, coming from an alleged Democrat, was specious enough to lead away many men who would never have yielded to Republican representations. This year there will be no chance to repeat that sort of thing. The leaders of this faction, who have been continually breaking into print with the boastful claim that they are Democrats, and that they cannot support the party, can do so no longer. They have shouted this from the hustings whenever they were favored with International Correspondence Schools street corners and in the market nesday and Thursday attending a conplaces. With the disbandment of their ference of the schools' representatives organization they are left without dis- of the western part of the state. tinet political entity, and will be swallowed up in name as well as in fact by the Republican organization. This renders them comparatively harmless, because without even pretense to the old name they cannot confuse the public mind or deceive unthinking people. In other words, the gold Democrats as an harassing factor in the national politics, have passed out of existence. From now on if they vote with the Republicans on the currency issue, they belong to the Republican party, and if they vote with the Democrats on the issues of imperialism and trust, they belong to the Damthe Brethren church in Snake Spring | ocratic party. They have no party of their own any longer. Meanwhile. Mark Hanna has tried to split the antiimperialists in twain by organizing the national party, and so prevent the whole body from endorsing Bryan. The new party has apparently dropped dead, however, and it seems at present The sympathy of the administration for Great Britain has been shown in several ways recently; by the sending months. By unanimous voi THE of the national committee of the Na GOLD DEMOCRATS. tional (gold standard) Democracy, in session at Indianapolis last week, the

plan to place a gold standard Dem ocratic ticket in the field this year was defeated. Each member of the committee expressed his views on the matter-eastern and western men severely opposed the proposition, taking the ground that there had been dissatisfaction and withdrawals from the ranks of the National Democracy and that the naming of a third ticket with the new issues now before the country would in no way tend to accomplish the end and aim of the National Democratic party in 1896.

When W. B. Haldeman, proprietor of the Louisville Courier-Journal and member of the national executive com mittee, arose a sensation was sprung In 1896 Mr. Haldeman actively aided in raising funds for organization and maintenance of the work of the Gold Democracy. He was, in fact, the mainstay of the goldites. As he spoke an After using two bottles of Electric impressive silence fell upon his audit- Bitters she is wonderfully improved ors. No same man believes this danger exists. The free and unlimited coinage of silver at the ratio of 16 to 1, without the consent of any other nation, has been relegated to another generation by this nation. It is a past issue.

My heart goes out to those who struggle for liberty in every nation, and I applaud and approve the expression in the Demo-cratic platform sympathizing with the Boers—a people who may be robbed of free citizenship in order to enable English greed to gather to its coffers the diamonds and gold of South Africa. Only in the interest of her own selfish purpose does England de-sire the amity of the United States of America. This Republican administration seems to love England more than it loves its own country-the great republic which to-day is be approached in the spirit of exact first in power, honor and place among the justice. To force this government into nations of the world. We cannot, we must not, encourage a weak and corrupt administration to barter free institutions and civil liberty in a combination with the most autocratic, arrogant and selfish power in all Europe.

I am compelled, with a sense of what is sword and torch into China in the spirdue to the free America that I love to earnestly and actively support an American rehom I believe loves his country and whom I believe to be the highest and best tupe of an American citizen, and thus be-living I shall vote for and support

At the conclusion of his speech Mr. Haldeman left the room, his withdrawal from the meeting announcing his withdrawel kom the committee and all further connection with the National Democratic organization.

Mr. Haldeman's opposition to further action by the Gold Democrats was ably supported by Louis E. Ehrich, of Colorado, who also resigned from the committee and declared that he would support Mr. Bryan. In a letter given to the press he sets forth his reasons for taking the course he has chosen. Like Mr. Haldeman, he realizes that imperialism is the paramount issue of the campaign. Among other things, he

the life of representation. As life advances in intelligence i gains in individual self-reliance. It gains the power of decision, the ability to make its own choice and selections. The faculty of self-reliance is one that should be considered in educational culture.

"Trust thyself," well said Emerson

Every heart vibrates to that iron "A poor thing but mine own," said Touchstone, and so saying, defined the secret of power. The new education is everywhere recognizing the importance of the education of the will, and to lead the will to express itself in outward habits and customs. This is a return to the principles of Aristotle, whose system of ethics furnished per nament illumination which has never een surpassed by any thinkers. "We acquire the virtues," he said, by doing the acts. "We become builders by building." To "know the best that has been thought and said in the world," which is a knowledge held by Matthew Arnold as desirable, is to know how far short of what is really This only is success. And, we, the great and permanent in thought, action or literature, one's own achievements are ant to be. All lives that are only one way to cure deafness, and that is in the best sense worth the living are by constitutional remedies. Deafness is so by virtue of being true to their own caused by an inflamed condition of the crescent. Great powers allied on great thoughts and, above all and beyond all, among the creative forces is the power

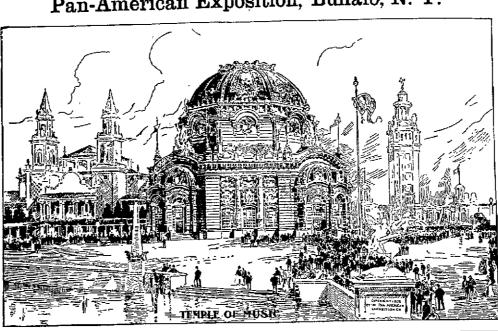

of the great faith. "What boots it what the soldier's mail, unless he conquer and prevail?" "One thing is forever good-that one thing is success." The theatre of our actions may be public and prominent or private and obscure. It depends. The light of the public square alone can test the statue. The ideal work implies behind it the endeavor to realize in it certain ideals of the erescent. Its fitness

for work inevitably creates its own the poster decorative idea. It has so theatre of action. Opportunity corresponds with almost mathematical accuracy to the ability to use them. A few years ago a celebrated sculptor made a statue of 'Opportunity." When placed on exhibition it attracted a great deal of attention. It represented a youth running at full speed. His hair instead of being ful picture, size 20 x 28 inches entitled blown back by the wind, as might be "The Maids of Fair Japan." It is by expected with a runner, bung in a mat over his forehead. The sculptor anticipated the surprised queries of his ing, but if you wish to be in the swim critics and had carved an inscription on around the lines of the girls' faces and the pedestal. The figure was answer ing the question, "Why is my hair on the flowers, and then paste the picture my forehead?" And his reply given on a dark background of any material.

We see great robust looking men go down lake ninepins, at a touch of disease, and wonder at it. It is simply the wound in the weak spot, the vulnerable heel of Achilles.

It is the office of Dr. Pierce's Golden Medical Discovery to build up the weak places, to strengthen the weak organs of the body. It does this on Nature's own plan of nourishment. Proper food properly assimilated makes a weak man strong. But the man is only an aggregation of parts, so that the strong man means strength of all parts, heart, lungs, liver, nerves, etc. "Golden Medical Discovery" puts into Nature's hands the niceans strength of an parts, neart, 17mgs, liver, nerves, etc. "Golden Medical Discovery" puts into Nature's hands the material by which the stomach is strengthened, the blood purified, the nerves nourished, the lungs vitalized. It makes the weak strong and the sick well. It contains no alcohol or other intoxicant.

MASTERING CHINESE.

One of the Wost Difficult of Lan It is well known that the Chinese language is one of the most difficult to master, and for us to attempt this task after we have finished our school years is excessively trying and difficult. Certainly the mistakes one hears of as being made by those who begin to talk and, worse still, preach in a language they fondly imagine they have mas-

tered are ludierous in the extreme. I heard of a clergyman who was preaching to a Chinese congregation in the vertacular. "Come to God, oh, my friends; come to God?" he cried (or thought he did) and was considerably surprised to find some of the congregation with broad grins on their faces. while others were frowning blackly. Great was the good man's consterna tion when he found he had been saying, "Call the pigs, oh, my friends; call the nigs!" His mistake, I believe, was due entirely to putting the accent on the wrong syllable, which altered the whole sense of the words.

The Chinese seem to regard a for

China has evidently profited by the lesson she learned in the Japanese war. There she met a foe whom she scarcely thought worthy of her steel and the civilized world. almost without an exception, believed that Japan would be engulied and swallowed up by her rich and mighty neighbor. But the world had made a terrible mistake: it could scarcely realize that a nation, which a few years ago ranked with Corea and the hermit empire of Thibet, stepped into that splendid arens where numbers were more than matched by the latest discoveries in military and naval science. throughout the civilized world. The Japanese had been ardent and

careful students. Wherever science could aid them they were swift to avail themselves of every opportunity that offered. China had magnificent battleships, but was ignorant of their possibilities. She had a mighty army, but it was no match for the perfecdiscipline and knowledge of the art of war exhibited by Japan. Japan had noble battleships and she knew how to use them; every sailor knew his place and understood the powers of was the man behind the gun.

been tremendous, but it is gratifying to know that in this time of need our national resources have been equal to the demands made upon them. It is only a few years since when we rejoiced as we computed the increase of our national wealth by millionsgrander still as we reach a thousand millions, which is the high water mark of the nation's prosperity. It is but a few months since that giant ships lay at our wharves unable to procure a freight, but to-day the United States, France, Germany and Russia are ardently competing for keels to convey their armies and supplies to the seat of war in China. Men are wanted for our battleships and our armies need thousands of recruits. Every available ship that can be chartered or bought is turning its prow to China, which is to be the gigantic battlefield of the world. For the present, South Africa, which

II Was Started In a Controvers, Over a Door Key,

As an instance of what great events can follow trivial happenings the genesis of the Crimean war is interesting. In 1851 Louis Napoleon demanded of

the sultan that the Latin monks should have a key to the great door of the church at Bethlehem; that they should have a key to each of the doors of the Cave to the Nativity and the privilege f setting up there a silver star bearing the arms of France. After a year of arduous negotiation

the Turkish government yielded, and in February, 1853, the keys were handed over to the Latin monks, and the silver star was established in the sanctuary of Bethlehem. Unfortunately Emperor Nicholas, as

head of the Greek church, considered this an infringement of his rights and immediately ordered 150,000 men across the Turkish frontier. At the same time he demanded that the Turkey should be secured by treaty with himself, but the sultan refused tria and Prassia.

The exar then proceeded to seize the Danubian provinces, proclaiming at the same time that he had "no intention

to commence war." The central European countries attempted to secure a compromise, but neither party would agree to their mediation, and in October the sultan England and France joined him, and

so from such slight beginnings sprang the most merciless, bloody and fruitless struggle of the nineteenth cen tury.-New York Journal.

I was surprised at the result, and it satisfied me that many arronoons conclusions had been drawn from such evidence in the past. It is cenerally supposed that the weapon must be held almost against the skin to eave traces of flame and powder."-

Most kinds of clay contain a considerable proportion of iron. The red color of bricks. for example, is due to the presence of oxides of iron. Whenever an object molded of clay is baked at the temperature of the potter's furnace in the presence of a magnetic field or influence, the otherwise homogeneous clay shows when cooled traces of magnotism in a definite direction. This inberent magnetism is sufficient to show the direction and give an idea as to the intensity of the magnetizing force that acted while the clay was in the fur-

GROWTH OF CARICATURE.

When my daughter was an infant she had a severe case of Scrofula, for which she was under the constant care of physiciata for more than two years. She was worse at the end of that time, however, and we almost despaired of her life. A few bottles of Suift's Specific cured her completely, as it seemed to go direct to the cause of the trouble. SCROFULA The Blighting Disease of

In many respects Scrofula and Consumption are alike; they develop from the same general causes, both are hereditary and dependent upon an impure and impovished blood supply. In consumption the disease fasten itself upon the lungs; in Scrofula the glands of the neck and throat swell and suppurate, causing ugly ranning sores; the eyes are inflamed and weak; there is an almost continual discharge from the ears, the limbs swell; bones ache, and white swelling is frequently a result, causing the diseased bones to work out through the skin, producing indescribable pain and suffering. Cutting away a sore or diseased gland does no good; the blood is poisoned. The old scrofulous taint which has probably come down through several generations has polluted every drop of blood.

Scrofula requires vigorous, persistent treatment. The blood must be brought back to a healthy condition before the terrible disease can be stopped in its work of destruction. Mercury, potash and other poisonous minerals usually given in such cases do more herm than good; they ruin the digestion and leave the system in a worse condition than before.

S. S. S. is the only medicine that can reach deep-seated blood troubles like Scrofula. It goes down to the very roots of the disease and forces every vestige of poison out of the blood. S. S. is the only purely vegetable blood purifier known. The roots and herbs from which it is made contain wonderful blood purifying properties, which no poison, however powerful, can long resist. S. S. S. stimulates and purifies the blood, increases the appetite, alids the digestion and restores health and strength to the enterbled body. If you have reason to think you have Scrofula, or vour child has inherited any blood taint, don't wait for it to develop, but begin at once the use of S. S. S. It is a fine tonic and the best blood purifier and blood builder known, as it contains no poisonous minerals. S. S. is pre-eminently a remedy for children.

that the ultimate capture of the ordnauce would seriously jeopardize the chances of the fort holding out. The necessity of spiking the guns was apparent, but a sortie in the face of the overwhelming musketry fire of the insurgents was out of the question. At this juncture an idea occurred to an artillery officer. He remembered having noticed, in making an inspection of the magazine, some old plate armor and, selecting from the best preserved

All the old band type, as everybody knows, is provided with nicks on the side, so that the typesetters don't have to look at the face of the type to know how to throw it in the 'stick.' Far back in prehistoric nick, but days the type had only one later two nicks became the style, and 30 years ago two nicks was the usual thing. But there came improvements in typemaking, and it was discovered that three or four nicks on the side of the type made it easier for the printer to handle, and so the three or four nicked type came into style and the two nicked type went into disuse and bad repute. Printers despised the two nicked type. About that time women got a foothold in the printing offices. They were not regarded with favor by the old time printers. The women and the two nicked type were in about the same category in the esteem of the old type, and it was very natural that he should come to express both by the have."—Chicago Record. same words. This branch of criticism and attack dates far back, but the greatest impulse it ever felt came from the age of tremendous speculation, when, in 1719 and 1730, John Law was manipulating things financial in France. Never before had the financial world been so carried off its feet as it was at that time. Members of the nobility were waiting for a chance to purchase A Remurkable Prediction.

Men hired out their backs for writing desks. so great was the press of business in naking contracts, and one hunchback is reputed to have made 100,000 francs n this way in a few weeks. The French went veritably mad over the chemes to become wealthy. Naturally the papers of the time, especially hose of Holland, carlcatured the state of affairs. There were pictures of all sorts, caricaturing Law, the nobility. the schemes and everything connected

It was this tremendous amount of pictorial work that first directed the energies of William Hogarth, in Lonion. In this direction. Carleaturing began to be used more and more in the political field, and soon afterward it caused the shelving of Robert Walpole from the English ministry. COLT'S INVENTION.

The First Great Improvement Made In Repenting Pistols, In this day of improved firearms the fact that the first great improvement made in repeating pistols by Colone Samuel Colt was patented in the day of our grandfathers is seldom recalled. It was Colonel Colt, then of New York to whom was granted the patent, Feb. 25, 1836. The original petition in the case was destroyed by the fire in De cember following. The letters patent were returned when application was made for the reissue, Sept. 1, 1848. The original letters are signed by Andrew Jackson, president; John Forsyth, sec-

retary of state, and Benjamin F. Butler, attorney general. After describing his invention Colonel Colt claims as new "the application of caps at the end of the cylinder, the application of a partition between the caps, the application of a shoulder over the caps as a security against moisture and the action of smoke upon the works of the locks, the principle of the connecting tod between the hammer and the trigger, the application of the

There had been a revolver patented about 20 years before by one Collin, but until Colt's invention little headway was made. Indeed it was not until Colt's invention had been given a trial by Major Sam Walker and his Texas rangers that it gained popularity and was regarded as a success. About the time Colonel Colt was applying for a reissue, in 1848, Mr. Wesson had filed an application for a re-peating firearm, by which the Smith & Wesson pistol of today is represented. -Washington Star.
